1022/1100 (92%)

BS Software Engineering, *COMSATS University Lahore*   2020 – present
Currently in 7th Semester

PROJECTS

My React Portfolio ↗
Created a professional portfolio website using React JS to showcase my web development skills. This project reflects my expertise in web development and serves as an interactive platform to highlight my work and achievements

The Bankist App
Developed an interactive Bankist WebApp in JavaScript which provides login functionality for different users to keep record of transactions of different bank accounts such as deposit, withdrawal and Loan.

The Pig Dice Game 🎲 ↗
Developed a Pig game made in JavaScript with interactive UI. 2 players can play this game, dice is rolled and score is added, you can hold the score and switch player unless 1 appears and all current scores will vanish if not held.

Task Tracker
An efficient and user-friendly TodoList application inspired by Google Keep.

Blogging Web Application
Developed a Web platform that empowers users to create engaging blogs while offering access to read and interact with content shared by fellow users.

Movie Ticket Management System
Developed a Java-based application automating streamlined reservation, ticket generation, billing, and admin control of movies and customer details for efficient monitoring and administration.
